

CONSTRUCTION METHODS

Pan Panel Enclosures can be made with or without tube frames, depending on size and application. A wide variety of features including hinges, latches and removable panels can be used to ensure easy access to equipment for service and maintenance.

Illustration A shows typical side wall construction with steel tube frame, hinges and cam style latches.

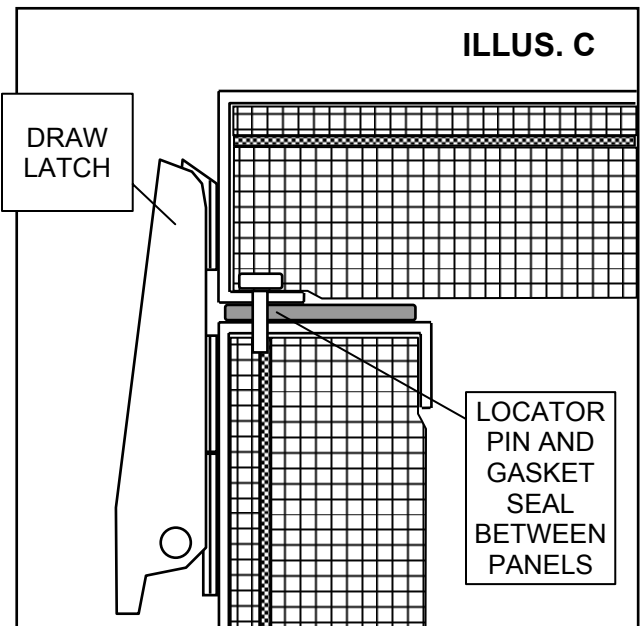

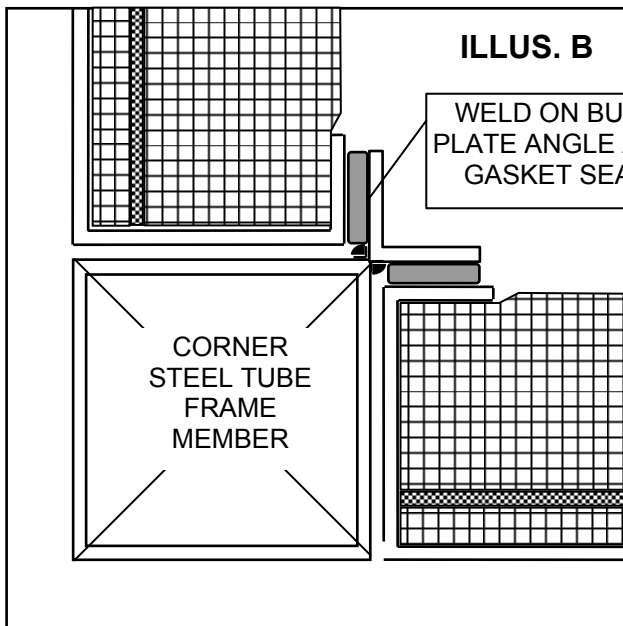

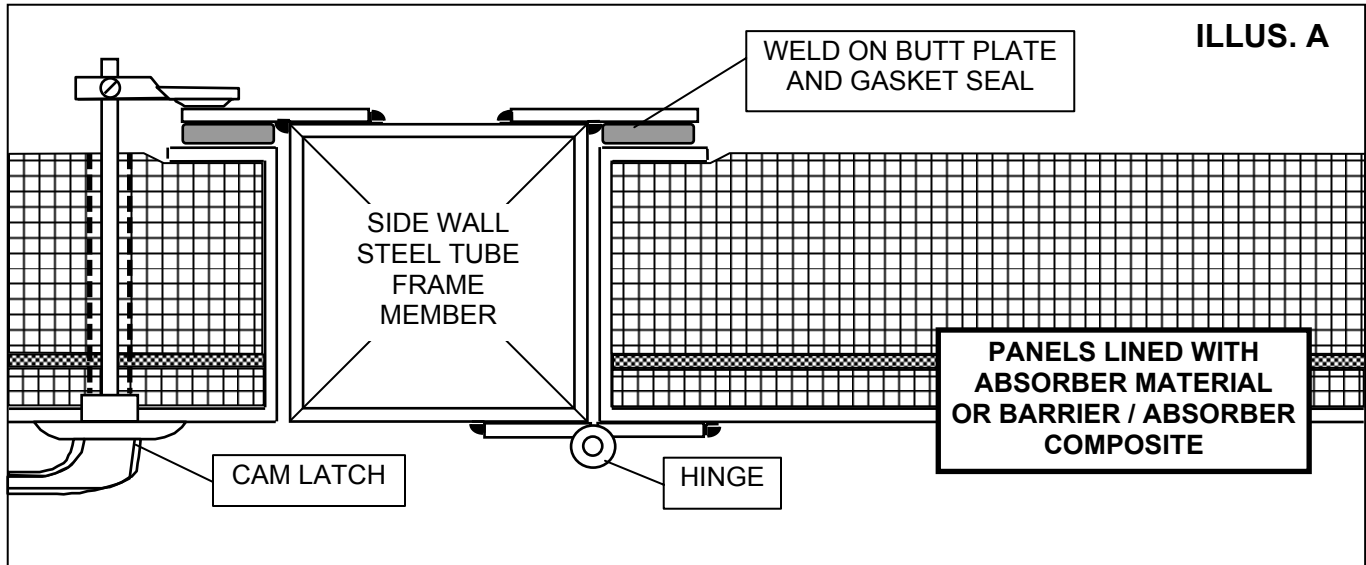

Illustration B shows typical corner detail of pan panels with steel tube frame.

Illustration C shows frameless panel construction with draw latch fasteners. Angle for corners and 'T' flashing between side panels can also be used instead of frames.
