

LiquidRoc 300

Grout Pouches

Liquid Roc 300 – is a unique method for mixing and applying resin for most anchoring, splicing and patching applications. The mix-in-pouch process is truly foolproof and efficiently produces predictable results.

The grout pouch is proven to be unsurpassed for grouting anchor bolts where the quality demands no possible error resulting from effects of the grout delivery system i.e. “field proportioning” or pouring and mixing of open containers by the installer.

APPLICATIONS AND PRODUCT DATA

AVAILABLE PRODUCTS

- Pouch – Polyester resin base, benzoyl peroxide hardener, limestone filler.
- Square cut rods – A307 steel, zinc plated. Other sizes, materials, and finishes available upon request.

ADVANTAGES

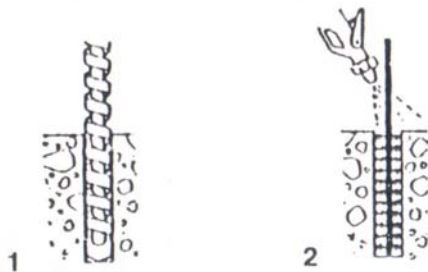

- No dispensing tools needed.
- Pre-measured adhesive.
- No mess mixing
- Will cure below freezing.
- Pourable consistency.

CONCERNS

- Cannot be used in horizontal or overhead holes.
- Must be used within 20 minutes after mixing
- 12 month self life.

Approval / Listings

- ICBO # 4320
- City of Angels # RR25020
- State D.O.T's as follows: AP, FL, GA, IL, IA, KY, MI, MO, NY, NC, OH, OR, PA, SC, TN, VA

Drill hole to correct size and depth using rotary-hammer.

Remove dust and rubble from the hole with compressed air, a brush and water. Excess water must be removed although may be damp. Hold each end of the pouch until color is uniform. Do not use excessive pressure or puncture pouch while mixing.

Cut corner and fill hole 2/3 full.

Insert stud turning slowly by hand

Leave it undisturbed through prescribed curing time consistent with the on-site temperature.

NOTICE Stated performance data is based on recognized testing methods. Product performance can be affected by field conditions and installation methods. Users of these products are responsible for determining suitability for their application and compliance with any legal provisions including those relating to health and safety.
